CLASSIFICATION: solid fro			opper and copper alloys are consid lid from. However, certain proce d welding could result in some ha	sses such as	cuttin	ıg, mill	ing, grinding, melting
OTHER INFORMATION:			Fumes from hot processes may contain other compounds with different exposure limits. Dust or fumes generated by machining, grinding, welding or thermal cutting of the copper may produce airborne contaminants. Consult Sections 3 & 8 for further information.

	SECTION 11 -	TOXICOLOGICAL	INFORMA	TION		
POTENTIAL HEALTH EFFECTS	: Symptoms related	to the physical, c	nemical an	d toxicologio	cal characteristics	
Under normal handling and u	ise, exposure to proc	duct presents few	health haz	ards. Dusts	may cause mechanical	
irritations to eyes and skin. I	ngestion may cause	transient irritatior	of throat,	stomach an	d gastrointestinal tract.	
Inhalation may cause coughing	ng, nose and throat i	rritation, and snee	ezing. High	er dust expo	osures may cause difficulty	
breathing, congestion, and ch	-					
EYE CONTACT:	If present as dust, copper may cause irritation, discoloration, and damage. As a foreign					
	body in the lens, copper dust may cause a dense cataract and discolor the lens.					
SKIN:	Copper can cause some irritation with po

swallowed.						
	Breathing metal dust may worsen symptoms of individuals with pre-existing chronic					
	respiratory disease. Follow exposure guidelines for copper dust and fume. Acute					
INHALATION:	exposure to dust or fume may cause upper respiratory tract irritation, metallic taste in					
	tigue, and/or metal fume fever. Breathing copper dust may worsen					
symptoms of individuals with pre-existing chronic respiratory disease.					ry disease.

OTHER ADVERSE EFFECTS

Copper metal is relatively insoluble in water and, therefore, generally has low bioavailability. This product is not expected to present an environmental hazard. Avoid releasing dusts and fumes into the environment.

SECTION 13 – DISPOSAL CONSIDERATIONS

Recover or Recycle if possible. Dispose of according to Federal, State and Local Regulations. Dust collected from machining, welding, etc. may be classified as a hazardous waste. Consult Federal, State and Local regulations.
