		SECTION 4 – FIRST AID MEASU	JRES			
EYE CONTACT:	Eye injuries from solid particles should receive immediate medical attention. Dust may be flushed from eyes immediately with large amounts of water, lifting the lower and upper lids occasionally; seek medical attention.					
SKIN CONTACT:	Cuts or abrasions should be treated promptly with thorough cleansing of the affected area. Wash the skin using soap or mild detergent and water. Get medical attention if irritation develops and persists.					
INGESTION:	If the product or dust is swallowed, seek immediate medical attention or advice. Do not induce vomiting.					
INHALATION:	If breathing has stopped, perform artificial respiration and obtain medical aid immediately. If breathing is difficult, provide fresh air and seek medical attention as soon as possible.

SECTION 11 – TOXICOLOGICAL INFORMATION						
POTENTIAL HEALTH EFFECTS: Symptoms related to the physical, chemical and toxicological characteristics						
Under normal handling and use, exposure to product presents few health hazards. Dusts may cause mechanical						
irritations to eyes and skin. Ingestion may cause transient irritation of throat, stomach and gastrointestinal tract.						
Inhalation may cause coughing	Inhalation may cause coughing, nose and throat irritation, and sneezing. Higher dust exposures may cause difficulty					
breathing, congestion, and ch	breathing, congestion, and chest tightness.					
EYE CONTACT:	If present as dust, copper may cause irritation, discoloration, and damage. As a foreign					
	body in the lens, copper dust may cause a dense cataract and discolor the lens.					
SKIN:	Copper can cause some irritation with possible discoloration of skin.					
	Ingestion of significant amounts of welding electrodes is unlikely. If copper is					
INGESTION:	swallowed and person is conscious, give large quantities of water to drink. Get medical					
indestion.	attention as soon as possible. Serious effects may occur if large amounts of dust are					
	swallowed.					
	Breathing metal dust may worsen symptoms of individuals with pre-existing chronic					
INHALATION:	respiratory disease. Follow exposure guidelines for copper dust and fume. Acute					
	exposure to dust or fume may cause upper respiratory tract irritation, metallic taste in					
	mouth, nausea, fatigue, and/or metal fume fever. Breathing copper dust may worsen					
	symptoms of indivi				ry disease.
