CLASSIFIC/	Copper and copper alloys are considered on "article" and not hazardous in its CLASSIFICATION: solid from. However, certain processes such as cutting, milling, grinding, melting and welding could result in some hazardous materials being emitted.						
OTHER INFORMATION: Welding or thermal cutting of the copper may produce airborne contaminants. Consult Sections 3 & 8 for further information.				ning, grinding, uce airborne

SECTION 4 – FIRST AID MEASURES							
EYE CONTACT:	Eye injuries from solid particles should receive immediate medical attention. Dust may be flushed from eyes immediately with large amounts of water, lifting the lower and upper lids occasionally; seek medical attention.						
SKIN CONTACT:	Cuts or abrasions should be treated promptly with thorough cleansing of the affected area. Wash the skin using soap or mild detergent and water. Get medical attention if irritation develops and persists.						
INGESTION:	Induce vomiting.						
INHALATION:	If breathing has stopped, perform artificial respiration and obtain medical aid immediately. If breathing is difficult, provide fresh air and seek medical attention as soon as possible.

	SECTIO	DN 6 -	ACCIDENTAL RELEASE MEASURES			
Clean-Up Procedures: Product in solid form may be picked up by hand or other means to be placed into a container. When cleaning dust, use methods that minimize the dispersion of dust such as a high efficiency particulate air (HEPA) vacuum, wet dust mop, or wet clean-up. Put recovered material in a suitable, covered, and labeled container.

	SECTION 11 – TOXICOLOGICAL INFO	RMATION			
POTENTIAL HEALTH EFFECTS	: Symptoms related to the physical, chemic	cal and toxicological characteristics			
Under normal handling and u	ise, exposure to product presents few healt	h hazards. Dusts may cause mechanical			
irritations to eyes and skin. I	irritations to eyes and skin. Ingestion may cause transient irritation of throat, stomach and gastrointestinal tract.				
Inhalation may cause coughing, nose and throat irritation, and sneezing. Higher dust exposures may cause difficulty					
breathing, congestion, and chest tightness.					
EYE CONTACT:	If present as dust, copper may cause irritation, discoloration, and damage. As a foreign				
LIE CONTACT.	body in the lens, copper dust may cause a dense cataract and discolor the lens.				
SKIN:	Copper can cause some irritation with possible discoloration of skin.				
	Ingestion of significant amounts of welding electrodes is unlikely. If copper is				
INGESTION:	swallowed and person is conscious, give large quantities of water to drink. Get medical				
INGESTION.	attention as soon as possible. Serious effects may occur if large amounts of dust are				
swallowed.					
	Breathing metal dust may worsen sympto	ms of individuals with pre-existing chronic			
INHALATION:	respiratory disease. Follow exposure guidelines for copper dust and fume. Acute				
INTALATION.	exposure to dust or fume may cause upper respiratory tract irritation, metallic taste in

OTHER ADVERSE EFFECTS

Copper metal is relatively insoluble in water and, therefore, generally has low bioavailability. This product is not expected to present an environmental hazard. Avoid releasing dusts and fumes into the environment.

SECTION 13 – DISPOSAL CONSIDERATIONS

Recover or Recycle if possible. Dispose of according to Federal, State and Local Regulations. Dust collected from machining, welding, etc. may be classified as a hazardous waste. Consult Federal, State and Local regulations.
